EDUCATION

FEDERAL UNIVERSITY OF TECHNOLOGY, OWERRI 2019 - 2024

- Bachelor of Technology in Information Technology

SKILLS

- Problem-solving and analytical thinking
- Clear communication and stakeholder collaboration
- Team leadership and mentorship
- Process automation and optimization

TOOLS

- Java, Python, JavaScript, React, & SQL
- Selenium WebDriver, Cypress, Appium, vstellar, BrowserStack
- Postman, Newman, REST Assured
- JMeter, k6
- Git, GitHub Actions, Jenkins & Docker.
- Jira, Zephyr Scale/TestRail, Confluence, Trello
- Allure Report, ExtentReports,
- Charles/Proxyman, Browser DevTools,

CERTIFICATIONS/LICENSE

- International Software Testing Qualification Board (ISTQB) - Foundational Level Certified Tester
- Association of Nigeria Software Testers (ANST) - Software Tester Certification
- TestarQuarter Certification - Test & Quality Engineer
- CISCO Netacad Certification of course completion - Data Analytics Essentials, CCNA -1, 2 & 3
- Udemy Certification of Course Completion - Software Testing Bootcamp

PROFESSIONAL SUMMARY

Results-oriented QA Test Automation Engineer with 3+ years of manual and automated experience validating web, API, and mobile applications for established FinTech, banking, and insurance organizations. I design and execute end-to-end test strategies, combining exploratory testing, automation pipelines, and AI-driven evaluations—to slash regression cycles by 70% and accelerate defect detection by 80%. By boosting test coverage to 95% and cutting post-release defects by 40%, I partner with product, development, and UX teams to translate user goals into targeted test scenarios, delivering secure, reliable software that delights customers.

WORK HISTORY

SkillConnect
UAT/ Beta Tester
JAN 2025 - APRIL 2025
Lagos, Nigeria

- Executed UAT scripts for 80+ critical mobile user flows, catching 65% of user-impacting defects pre-release.
- Logged over 100 high-severity beta issues, enabling fixes before production launch.
- Integrated beta user insights into development, increasing post-release customer satisfaction by 20%.

Swiftfiat
Quality Assurance Engineer
JUN 2024 - JAN 2025
Abuja, Nigeria

- Implemented a scalable testing framework that delivered a bug-free financial platform and seamless user experience.
- Revamped testing methodologies and procedures by identifying gaps and applying targeted enhancements to eliminate inefficiencies and elevate quality.
- Established continuous testing pipelines grounded in best practices, accelerating the speed and precision of regression and integration tests.

Conference Recruitment and Consulting, LLC
Test Automation Engineer
JAN 2025 - MAY 2024
Accra, Ghana

- Conducted comprehensive testing (positive & negative scenarios) for web, desktop, mobile, and API components of an online insurance application.
- Used Selenium WebDriver to identify over 50 critical bugs, and collaborated with developers to prioritize and resolve maintenance issues.
- Automated test scripts, reducing regression testing time by 40% and ensuring smooth third-party API interactions.

Integrated Oasis ICT services
Web developer
MAR 2022 - NOV 2023
Owerri, Imo State NG

- Developed and optimized responsive websites with HTML, CSS, and JavaScript, ensuring peak performance and reliability.
- Managed and tuned SQL databases to support scalable, data-driven applications with enhanced stability.
- Architected secure web applications in strict compliance with regulatory and security standards.
- Authored clean, well-documented code to facilitate maintainability and long-term project success.

PROJECTS

Mini-QA-Stack Automation Test
Tech Stack : Java, Selenium, Git, Maven, TestNG, Rest Assured, JMeter, Docker
- To create a scalable, maintainable automation framework that delivers end-to-end functional, API, and performance testing for a demo application, showcasing a streamlined QA stack.

Timerapp — (Upwork) Manual Tester
Tech Stack : Jira, Excel, BVA,
- Participated in crowdtesting with a cross functional team, found and reported over 25 valid bugs and performed regression testing and documented a detailed report

Exchangepro app — (Google Play) Beta Tester
Tech Stack : Jira,
Participated in a 14 day internal testing for a financial exchange application, found and reported over 10 valid bugs.
